

Illinois Aviation Academy, Inc. AeroCamp enrollment is now open for 2023!

Each year, Illinois Aviation Academy, Inc. (IAA) is excited to provide an opportunity for young men and women to experience aviation through the AeroCamp program.

Basic Campers will learn about different aspects/careers in aviation, fly drones and rockets, flight train, and complete activities designed to develop teamwork qualities.

Advanced Campers will have the opportunity to experience EAA “Airventure” located in Oshkosh, obtain over eight hours of ground instruction, as well as four days of flight training in the airplane. This program allows future pilots to hone their aviation knowledge and excel in a team environment.

These Summer Camp programs are unique in the United States as they include “flight training”. This year, the camps include even more flight opportunities for campers than ever ran before.

2023 Basic Camp dates are: June 26th through June 30th and July 17th through 21st

Includes: 3 flights w/ instructor, ground school lessons, snacks/water, and fun team building activities

Cost: \$950

Minimum Age: 12

2023 Advanced Camp is: July 24th through 28th

Cost: \$1450

Includes: 4 flights w/ instructor logged, 8 hours of ground school logged, trip to EAA Airventure, snacks/water, and program

Minimum Age: 14

*For an additional charge students can obtain Cessna kit (includes logbook) and waive school enrollment fee (\$200). Students can also purchase a logbook without the kit for \$12

***Students cannot be suffering from any depressive condition as that is outlined by the FAA as a disqualifying factor [Pharmaceuticals \(Antidepressants\) faa.gov](https://www.faa.gov/air_traffic/flight_info/aeronav/digest/items/antidepressants).**
